

**Multivo™**

Simplify daily maintenance  
and planogram changes

**Technical sheet**

We are **supporting**  
**our customers**  
on their journey  
to a more  
sustainable store

### **Recycled plastics**

Recycling is key to reducing waste and moving from a linear to circular society. We have invested in equipment to enable us to recycle our own factory scrap, making sure that as little material as possible is wasted in the production process. In addition, we are sourcing postconsumer recycled material from external suppliers. Availability differs between different types of plastics. Most often recycled material is mixed with virgin material to ensure that our high-quality demands for the end

product is met. Increased recycling is an efficient way to decrease the environmental footprint today. By decreasing the usage of virgin fossil based plastics we, together with our customers, have the possibility to reduce the carbon footprint of the retail business. We are proud to offer HL Sustainable Choice, a growing range of sustainable merchandising solutions made of renewable or recycled materials.

# Improved visibility & high flexibility

**Multivo™ ensures well-merchandised shelves and efficient space usage while saving time on daily shelf maintenance.**

## Key benefits

- Save time on shelf maintenance due to automated front-facing and faster refilling
- Always attractive shelves
- Easier and faster fixture changes – installation and planogram changes require up to 80%\* less time

**Multivo™ is suitable for a number of packaging types and sizes thanks to features such as**

- Fast refilling thanks to flip-down front
- Different dividers and lengths, combined with pusher or Pull-strip™ functionality
- Only front-rail needed

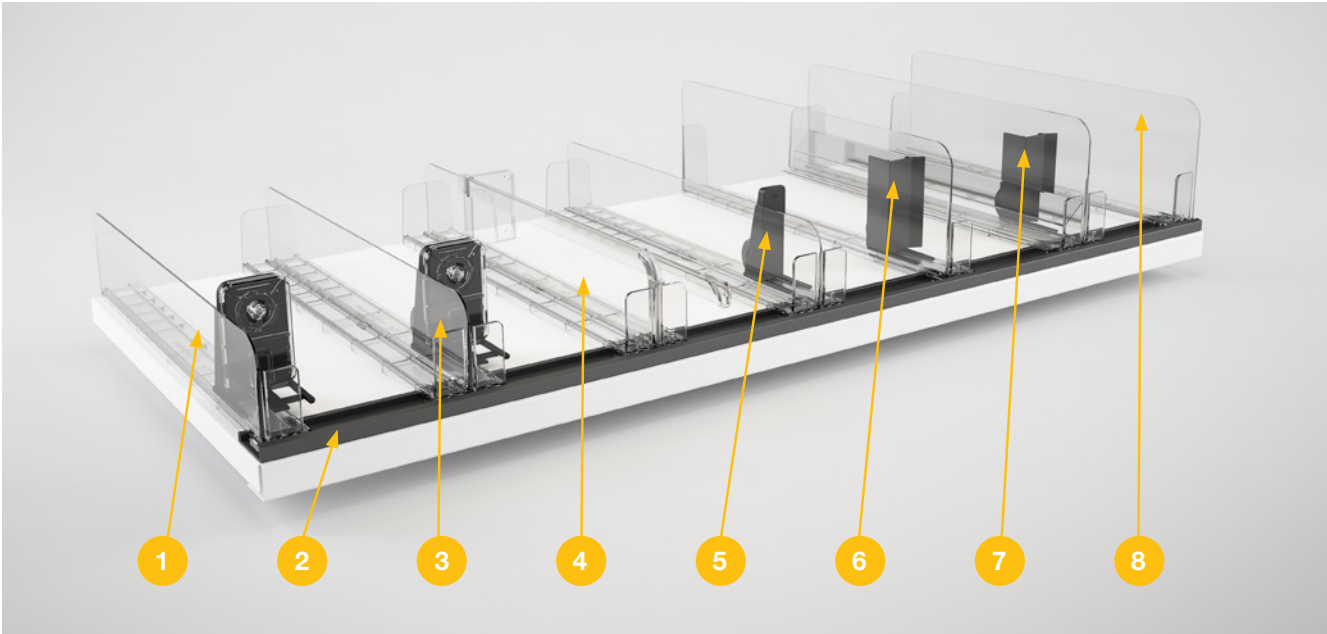

## Recommended categories

- Health and Beauty
- Beverages
- Spices
- Bagged salad
- Dairy (sliced cheese)
- Pre-packed deli and meat
- Cold cuts (ham, bacon etc.)
- Canned food
- Block of chocolate
- Toys

# Range overview

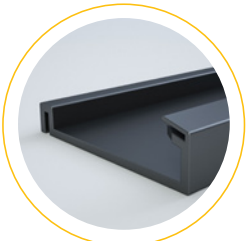

## Improve product visibility

Our Multivo™ range includes a wide assortment of pusher dividers, suitable for most pack types. Combine T and L dividers to fit the facing width perfectly. Multivo™ improves product visibility as fronting is automatic with the integrated pusher and just as easy with the manual Pull-strip™ version. The system only requires a front rail which makes installation and daily work much simpler.

# Dividers with pusher

Multivo™ is a shelf merchandising system that makes the daily work of refills, front-facing and planogram changes easier and faster than ever. By including push & pull feeding into one system more facings can be fronted automatically, especially in complex categories such as Health & Beauty. This way shelves always look attractive and well-stocked without staff having to invest too much of their time keeping the shelves in order.

**Reducing time spent on fronting, refilling and planogram changes is a key factor for today's retailers.**

## Flip down front

Reducing time spent on fronting, refilling and planogram changes is a key factor for today's retailers.

- All dividers have flip down fronts
- The front folds inwards enabling faster refills
- A full tray of products can be inserted in one go
- Maintain a nice category, even at peak trading hours - products are easily replaced in the right lane by shoppers!
- Save space by placing shelves closer

# Dividers with pusher P50

The pusher is by default placed on the right side of the divider. The L divider, left or right, is placed on the shelf ends.

# Dividers

Multivo™ L and T dividers with Pull-strip™ are suitable for fragile products where pushers can't be used. Also useful for double stacking of puck shaped jars and heavy glass jars. Can be combined with Multivo™ pusher dividers for optimal shelf management solution.

**With the Multivo™ Pull-strip™, products are gently front faced.**

# Rails and accessories

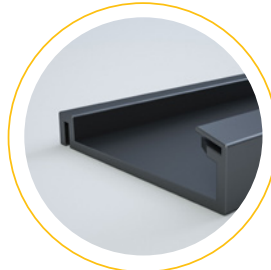

Multivo™ universal rail ensures a solid fixation of the dividers at the front of the shelf, no additional fixation with a back rail is needed. The universal rail can be attached with tape or magnet on solid shelves and with MU-CLIP on wire shelves (3 mm).
