Product details:

- Tamper-proof plunger
- Replaceable adhesive back can be applied anywhere and dœsn't damage packaging
- 90+ decibel speaker for alarm
- RF or AM feature for EAS gates

- Sensor for easy strobe key activation and deactivation
- LED light to indicate activity
- Security tag identification
- Replaceable battery
- Available in black or white

Introduction

Theft notification at the point of concealment is the largest advantage of LM technology.

LM Tag™ uses a combination of a light sensor and motion detector to recognize product concealment instantly at the shelf level providing a notification to store employees. It alarms at the point of theft, making it the only device on the market that has the ability to alert you before product walks out the door.

There is a plunger on the bottom side of the tag. If the tag is removed, the plunger expands causing instant full alarm.

LM tag™ adds another layer to store security as the the EAS gate is triggered from the internal EAS tag in the LM housing. The EAS gate will alarm when the tag moves through the space.

Product features

SPECIFICATIONS

- LM Tag™ size is 38 mm x 38 mm x 12.7mm

- Small size doesn't detract from product branding and adhesive back holds firmly to product without damaging packaging.

- Suitable for a large variety of boxed, blister-packed, and pegged items.

- The LM Tag™ is designed to be applied anywhere on the product, allowing you to best merchandise products and maximize retail space.

- With the LM Tag™, items are not locked up or stored behind a desk, allowing customers to interact with the product and eliminating the need for additional staff assistance.

- After concealment and when set in motion the LM Tag™ pre-alarm (chirp sound) will notify for 12 seconds. After 12 seconds, the tag will alarm regardless of where the tag is located.

(!) The LM Tag™ is designed to be applied anywhere on the product, allowing you to best merchandise products and maximize retail space.

LM alarm tag

HOW IT WORKS

In a bag, under a coat or slipped into a pocket. These are all places a would-be thief conceals product. By the time the thief walks out the door, it's too late. The LM Tag™ alarms at the point of concealment, preventing theft before it occurs.

LM Tag™ alarms when:

- Monofilament is cut
- Device is removed from package
- Prolonged concealment and movement
- LM Tag™ is removed from the tag mount
- RF or AM features for EAS gates

LMT

LM Tag™ is avaliable in black and white.

When concealed and in motion, the LM Tag™ first beeps a warning, then alarms.

Removing the LM Tag™ triggers the alarm.

Components

CORNER ADAPTER	CLIPS	ANTI-SKID PADS	ADHESIVE BACK
LMCA	**LMC**	**LM ASP**	**LM RP**

Enhance security by using the corner adapter to prevent opening of product. LM Tag™ fits within Corner Adapter to create a seal, and can be used again and again.
Form fitting alarm holder adaptable for LM Tag™. Key accessory in making it appropriate for a wide variety of products and packaging types to be secured.

Helps keep LM Tag™ in place when used with clip, and on slippery surfaces.

Simply replace adhesive back to re-use LM Tag™. Quick and easy to apply.

Security wrap

MONOFILAMENT SECURITY WRAP

The LM Tag™ works with monofilament security wire, making it appropriate to wrap around a wide variety of products and packaging shapes and lengths. Wire provides a clear and unobtrusive security without interference to visual merchandising and packaging.

The wire is available in 400 foot rolls and can be cut to various lengths for a custom secure fit.

Deactivators

DISARM THE LM TAG™

Deactivators use a unique strobe light sequence to disarm the LM Tag™. Unlike magnetic detachers which can be duplicated or defeated, no other deactivator on the market can replicate the light code. Available in personal handheld or countertop options.

HANDHELD OPTION

LM SD

- Light and easy to carry
- Compatible with SONIQ™ Alarm Hook product line

COUNTER TOP OPTION

LM CTS

- Attaches with adhesive or hardware
- Can be mounted on top or side of counter

LM Tag™ – Prevent theft before it occurs!

The LM Tag™ uses the combination of a light sensor and motion detector to notify when the product is both in motion and concealed. It alarms at the point of theft, making it the only device on the market that has the ability to alert you before product walks out the door.
